Use Case Document

Name:	Day One: Sign In and Create Journal Entry
Summary:	A user will sign into their Day One account, create an entry, then add information to the entry.
Version:	Day One iOS 3.7.1
Preconditions:	1. Device must have power 2. Network connectivity is required to sign in and sync 3. User must have Day One account
Triggers:	User opens Day One and is shown a sign-in screen. After sign-in, they are shown buttons to create entries.
Main Success Scenario:	1. Day One opens successfully 2. User is shown sign-in screen 3. User enters email address and password for a Premium account 4. User is signed in 5. User taps "Create Entry" button 6. User adds a photo from the Photo Library to their entry. The photo is then synced. 7. User types text into their entry. The text is then synced. 8. User adds tags to the entry. The tags are then synced.
Alternative Success Scenario:	First Alternate 1. Day One opens successfully 2. User is shown sign-in screen 3. User enters email address and password for a non-Premium account 4. User is signed in 5. User is prompted to subscribe to Day One Premium subscription to enable syncing 6. User subscribes to Premium

	7. User taps "Create Entry" button 8. User adds a photo from the Photo Library to their entry. The photo is then synced. 9. User types text into their entry. The text is then synced. 10. User adds tags to the entry. The tags are then synced. **Second Alternate** 1. Day One opens successfully 2. User is shown sign-in screen 3. User enters email address and password for a non-Premium account 4. User is signed in 5. User is prompted to subscribe to Day One Premium subscription to enable syncing 6. User chooses not to subscribe to Premium 7. User taps "Create Entry" button 8. User adds a photo from the Photo Library to their entry. 9. User types text into their entry. 10. User adds tags to the entry. 11. Their new entry is not synced because they didn't subscribe to Premium, but they can still view the entry.
Postconditions:	1. In the user's journal, there will now be a new entry in the timeline. 2. On the server, there will be one more entry saved under the user's account 3. On the server, there will be one more photo stored than before under the user's account.
Business Rules:	1. To enable syncing, the user must have a Premium subscription. If they don't, they will be prompted to subscribe. 2. Premium is also required if more than one photo is added to the journal entry.

Notes:	The Use Case Diagram for this Document assumes that the user already has a Premium subscription linked to their account.
